Requires: Mastermind Group [CVI-MG] : [Order_MG]

The Mastermind Group faculties are intrinsically heart, mind and soul. It is a whole lot more than mere academic and intellectual ramblings, thesis and theories. It is not based on arguments, contention or division, but more to idea generation, plans, strategies, goals, inventive and innovative genius, combinations of manifold equations, options, opportunities and possibilities.

Co-operative ventures, initiatives and endeavours are essential, even if there are extremely powerful competitive natures and market realities at play. Capabilities, performance, results and success are important, but so is the process of learning, discovery, teamwork, enabling new possibilities where none existed before and doing those things that really put us in our zone of expertise, happiness, fulfillment, challenge and reward, our purpose and what we really enjoy. We do things because we want to.

Creating revenues and meeting the commercial requirements of an enterprise, help us to do more of those things we like, this adds to the quality of life, our alternate reality. This also includes creating powerful combinations of people, resources, assets, operations and much, much more. This involves creating the ideal operating environment that starts with something basic, complex or somewhere in between, resources, conditions, ideas and successful goals achievement is a work in process, we start with what we have and make progress, step by step by step. This is part of the adventure, part of the process, making friends, having new experiences, growing and getting better and better all the time. We excel, grow, overcome and achieve our greatest dreams and ambitions and all those things that lead up to that, an essential part of our journey.

In this endeavour we are dedicated to the process, enlightenment, awareness, perception, perspective, creative imagination for the practical, visionary and ambitious in scope. We also need measurable results, tangible evidence of our progress. Progress is from thinking and doing, believing and achieving, inventing and innovating, saving and building, working and organizing, managing and refining, improving and enhancing, development, acquisition and investment, working together in new combinations of wealth and wealth producing power, channels of wealth, elements that like to work together and are very productive and profitable in many more ways than the single bottom line. Intellectual capital and property is all part of that, here it is more than trading time for money, it is about creating a lot more value, amplified in a bigger for effective and efficient way, it is about the challenge and reward and making sure everyone is compensated appropriately, generously, providentially and yes even about more opportunities and options available to be maximized and optimized.

Although people have an idea what intellectual capital and property is, they often don't know how it can be invested in a secure manner, that even time and other non-financial investment options are possible, or that inventive genius cannot be measured on the simple time for money equation, since a brilliant flash of genius, inspiration or intuition that comes with a remarkable degree of understanding, knowledge and even wisdom to make it all possible. So, it is essential to enable compensation, create more opportunity, challenge, reward and combinations of wealth and possibilities that can transform one's life now and far into the future, with the realization that there is plenty for all. These types of endeavours, organization and investment can create a vast stream of revenues and much more over time, beyond anyone's ability to work and work and work. So, we invite our members to explore those options and think in terms of a whole new potential of possibility, that your time has arrived and that there is indeed a time and place for everything, and for an idea whose time has arrived. This is about making a difference, working together and creating vast amounts of wealth as we take more time to think things through and create more of an exciting and fulfilling life in a world without limit.

With the Mastermind Group, all of this and more is available simply by choice. A greater understanding of this mindscape is a lot like the big picture puzzle and how the inter-locking pieces all fit so well and really impress an encompassing brilliant piece of work, complete with the famous stroke of genius loaded with amazing gifts, talent and natural ability into far reaching and transformative powerful new realities.

When we combine thinking, inspiration, vision and many creative, artistic, inventive and innovative gifts, talents, abilities and flashes of insight, with doing, materialization, development and advances in a trade, technology, process, new product or otherwise, we have it in our power to add a lot of value, and as a result generate more interesting and exciting opportunities, potential, research and development, with additional corresponding challenge and rewards.

Patents, copyrights, industrial design, trademarks, proprietary expertise, trade secrets and the like, in addition to all kinds of creative, artistic and forms of production can definitely add to any portfolio, either from direct intellectual capital and property contributions, or a person, in this case a member with provision of assets and resources allocated in those related opportunities that amplify and generate wealth, revenue streams, production rights, licensing and related benefits and add value, increase capacity, expand potential, make new friends and business relationships and help bring something to the world in a more valuable and worthwhile way. Compensation works both ways, whether it is financial and non-financial investment, contributions or otherwise, or simple the supplier of intellectual capital and property. The opportunities are not necessarily mind bending or boggling, but definitely is an exercise in your faculties of creative imagination and sometimes at the expense of prodigious sums of mental energy or insights of pure genius, inspiration and revelation, all useful for what we are doing. Working on a project and getting paid for it is great, but so is having a bigger reward, recognition and revenue as a result of taking care of business!
