- 3) Investment & acquisition; short, medium & long terms horizons;
- 4) Secure product & services acquisitions-offers & requests, buy, sell, trade;
- 5) Special promotions, programs, projects, products & services;
- 6) Integrated buying and acquisition groups – greater value for our members;
- 7) Project co-development, business combinations, joint ventures & commerce;
- 8) Project design, development, operations - creating value, abundance & success;
- 9) Business & financial transactions, secure supply, official supplier/OEM;
- 10) Provisions for facilities, machinery, personnel and logistics infrastructure;

Explore & Discover :

Opportunities exist for products and product related services at various links in the production and supply chain that are useful to promote, acquire, integrate, specify and build with. This includes the capacity to meet, exceed or be OEM/official supplier for design and/or engineering criteria that may be off the shelf, or customized items where greater value in products, quality, customer service, brand and features may be passed on to the builder, buyer or customer. Pro-active general or strategic planning and business options for projects, product, schedules, quantity, quality and spec's are possible. Members may work with, contribute to and acquire products and services with expanded market logistics, project management and a focus on high quality, value and service. This endeavour enables commercial and private trade and also the LETSystem, mutual credit and other currencies.

As many people know and agree with, to the extent that resources, people, machinery, lead times for materials and services, money and of course permits can be organized effectively and efficiently, projects can be managed to be on time, within budget and in accordance with the quality and specification envisioned and contracted. With a strategic custom supply base integrated with the CVI-Options advantage, the potential for the acquisition of products and developing co-operative business relationship options are increased. Finding someone that we like to deal with because we want to and not forced to, or have no choice, is important for us all. There are excellent companies and people who really are the star of the show and can get things done. We hope with the Construction Products Account and Portfolio, this can be a useful and valuable contribution to the big picture, as we contribute to each others success.

- **Construction Products Account**, is another exciting option either from people in the trades that make, buy or sell products and services, acquire products or services, invest and/or contribute, generate revenue streams, secure conversion options into products and services, or a few business options, use the conditional sales and/or acquisition contracts or agreements for products and services and helping build a business that treats you like gold. So, if you or someone you know requires or will require products in the future, this is awesome to have since you are going to spend money anyway, this will optimize everything.
