

Capital Vault Incorporated – Trade and Technology Group [Order_TTG]
Financial Technology & Products Account [TTG_A_FTP]

Opportunity & Vision:

- We have a few interesting options in this portfolio that does have a lot of potential., In addition to smaller niche markets there are large mass volume markets that need to be served in more custom and personal ways, building long term relationships and mutually beneficial transactions and wealth building on many levels, while passing along advantage to members for a more rewarding and prosperous experience.
- The FTP Account has opportunity in the credit card and financial transactions market in capabilities or the resources, facilities and technology that makes that possible, in both existing and innovative and inventive technological, products and services, plus the capacity to add a lot of bonus compensation and a vast range of CVI-Options built in.
- Advance surveys and notice of interest in the typical Unified Account and Unified Portfolio Options style offer plenty more details and possibilities worth exploring.
- Find out how easy it is to optimize securities, options and opportunities at all levels with entities, jurisdictions, associations, co-operatives and other useful, powerful tools that work like magic right out of your financial toolbox for short, medium and long term timelines.

Explore & Discover:

- Beneficial options for Canadians, enterprise, entrepreneurs and people in general that will continue to grow, expand and contribute to the quality of life and everyday adventure with innovative and very customized capital structure with private securities, business combinations, joint venture and integrated business units, with options in control, ownership and other excellent features. There is no limit to this market and if you don't find what you are looking for, we will invent it for you.
- Pre-IPO company opportunities multiple choice points on the time line, with public shell and public IPO Options offering avenues worth exploring. We have several intriguing prospects.
- Opportunities in the technology and machinery making polymer bank notes and securities is also available right now in this portfolio which is beneficial for countries transforming their paper currencies into polymer notes in addition to the growing private securities market for people that love real certificates and like the idea of polymer securities notes. This is for people and companies that don't trust anything in an all electronic format, the street name, transfer agents, any remote possibility of fraud or anything that does not give them an honest and effective vote like having to deal with shares that are worth 100:1 or 1,000:1, stuff like that. This portfolio is definitely for you. We have some of this infrastructure now and the only thing we need is your vote of confidence and free pro-active choice.
- ATM acquisition and deployment, bank vaults and safes, security systems and technology are all portfolio possibilities, including companies making it, installing it or using it. We have plans for you and ATM networks, E-commerce resources, technology and capacity development is also in the portfolio with additional revenue stream benefits from shopping cart, website creation, product and service integration and mass market options with lower automated costs. These all have considerable initial time and intellectual capital costs, however, yield over time, special promotions, bonus compensation, markets, customers, products and services generate additional wealth This can also fuel resources for establishment of more regional or local establishments and operational centres, creating more jobs that include CVI centres to work at, be involved or simply check up on your portfolio and friends!
