

Capital Vault Incorporated

CVI Overview

We would like you to know that this is a work in progress, dedicated to continuous improvement and although there is a lot to read, study and learn about, we hope that it is enjoyable, rewarding, encouraging, positive and constructive in every way.

We also hope that it is easy to navigate your way around, quick to understand notwithstanding the degree of unconventional, advanced and comprehensive aspects of this endeavour, in addition to the pure volume of materials available here plus other documentation and resources you may acquire.

We like to keep our business simple, promise what we can deliver and deliver what we promise. So we will start with a little awareness to get a good idea of how this website works and arranges the CVI-Options within the CVI-OS 1.0.

Every type of **Membership Group Option** has a central theme, a main idea that offers certain capabilities that is mission configured, involving programs, projects, technology, products, services and various specialized components.

Each of these Membership Group Options have corresponding **Accounts** that are specific to that membership. Every Account has a specific purpose in accordance with a particular program that is mission focused with various operational capabilities. Every Account also has several **Portfolios** that are directly related to that endeavour.

A **Portfolio** may have a **Portfolio Series** of integrated and related portfolios to be even more specific. An example is the Tools & Machinery Development Program, the Woodworking Machinery Series, and then zooming in on a particular type of machine.

At every stage there is more intel, general and specific options with various order and transaction configurations. These all have intel and order codes that make it very easy to know exactly how things operate and to ensure that everything is done right to achieve goals, fulfilling member and customer requirements, providing avenues for contribution and subsequent deployment. This allows members to focus in on what is important, relevant, useful and interesting to them. We have organized resources that are downloadable in printer PDF, so if you want, it is useful to set up a folder and organize it right away, however with membership this will be provided for your convenience.

For those who do not use or have access to a computer, or don't want to do anything online and only personal, private and real mail, it may be possible to work with a **Business Options Agent** who may use their computer as well as provide printed materials to get you started as you may find out about CVI in person anyway. This endeavour is geared to go at various speeds and directions. We do not need your credit card and you don't need to use a computer or go on line and deal with all those complexities, risks and issues if you are not interested.

Business Options Agents dedicate time with the **CVI-Personnel Development Program** and advance their skills, understanding, competence, perspective and to help others with any aspect of Capital Vault Incorporated. (Please see the Public Notice about what we do not do.)

Business Options Agents may have other qualifications, credentials and other industry associations that may include those listed in the Public Notice, however it is not a requirement. What is required is the support and belief in Made in Canada and helping others achieving their goals and having a better quality of life. If you like to get involved personally in a multi-dimensional renaissance, that's great. If you like to be part of the solution and believe

Capital Vault Incorporated

you can make a difference, that's perfect. If you are not sure, we will help you figure it out and how it all can be possible and that we can build great things together!

Moving on, we have a **Portfolio Series** and is defined more precisely with a **Class**, almost like being in class at school, college, trade and technical institutes and university. Don't worry you will get a pop quiz in the mail! Classes of people, securities, machinery, business types and industries are all examples.

Program Options also have a specific purpose and these are translated down in availability and participation through the various **Membership Options** that are designed and configured for people like us who like to think in terms of a revitalized manufacturing sector, an energetic, caring and sharing community, challenging and rewarding jobs, opportunities and other exciting options, nation building projects, thinking, doing, being, living and having abundance, prosperity, health, everyday adventure, buying local, buying Canadian, feeling good about ourselves and what we are doing, stuff like that!

Order Options are simply what you choose to acquire, sign up to and be involved in starting with membership accounts and getting more focused, setting goals and reviewing and choosing a course of action to achieve those goals, whether in financial or non-financial investment and/or contributions of one or many types of combinations over time.

There are high powered competent options for asset and resources protection and management, all kinds of business options and direct pick and choose levels of involvement to match up with various amounts of time, energy, resources, money and budgets, personal and professional goals, commercial and enterprise requirements and the most challenging national economic and national security demands.

There are options to get involved by being a private member with the rewards and satisfaction that simply cannot be measured by only money and power, as our focus here goes beyond that much further and works in consideration of the multiple elements that we must consider with the responsibility, integrity and discipline to build the kind of country, communities, companies, technology, projects, products, services and opportunities for the long term. This is an important distinction, as the basic retail structure is not like this at all and you have a virtual zero chance at influencing the results in terms of economic, industrial or community development other than exporting your dollars destroying and defrauding your own destiny.

Options can be more general or extremely specific, acquire technology, products or services, reserve something you want, keep your options open, dedicate resources, secure your options and enjoy the rewards. If you don't find something that meets your requirements including financial and investment options, perhaps we can develop something mutually beneficial, after you have reviewed what is available.

If there is anything that you don't quite understand, please let us know and we will work it out. We do not have a definitions page here, but one is planned, even though we try to keep things to the point, we know that there are unconventional and alternative ways of doing things, as many existing structures, beliefs and operating systems have been inadequate or even obsolete. There is no fine print and we can supply all documents in larger type also.

Our Portfolio has a very diversified and focused group of options, products, services and other related resources that is integrated and fundamental with all that we are doing and sharing. The **Unified Accounts** exist in every membership option and we also have the **MAX RSVP Account** to not only generate great wealth, but also options, opportunity, more time to optimize your decisions and convenient ways to get involved at any point of the timeline far into the future to keep or secure various options in a general or specific application.

Capital Vault Incorporated

There are various levels of involvement, contribution, options, acquisitions and so on, and these are configured to the membership options and the portfolio that goes with it, as each one is different, however, the common features of this type of account remain consistent. This is a great way to make serious money, increase buying power and saving power by a significant margin, plus generate some excellent business options and revenue streams with your lifetime membership as you acquire something you like, need or want, all made right here in Canada. This is great news for everyone who use CVI-OS 1.0.

The **Unified Portfolio Options** are offered or available from a particular membership account and portfolio, that may also be a program or a special promotion that is available to all members throughout the CVI-Options. A good example is the Boots for Life Program, the Ultimate Woodworking Group or anything else listed like that.

What is important to know that this is focused on enterprise development, Made in Canada, technology, products and services, things that you can choose to participate in building and sharing the rewards, business options revenue streams and to be able to acquire those products and services that you contribute to, or another fantastic range to pick from. This is also about creating jobs and careers, really good ones that pay well and where a comfortable and enjoyable quality of life is possible. The products are focused on high quality Made in Canada, custom and production markets, with all kinds of ways for members to get involved and be part of the team. This operates as a private member co-operative type of enterprise with private buying group, development group and investment group elements. This is dedicated to existing and future entrepreneurs and enterprises primarily in the manufacturing sector that is more fully defined throughout the various CVI-Options, Accounts and Portfolios.

Response and feedback is important to us, so feel free to contribute to the suggestion box, ask questions or make requests or other valuable contributions. If there is something specific you need or want, please let us know, if we don't have the program or resources for it, maybe there is a way to make it possible. If you are a little lost, confused or mixed up, we would like you to know we will do all we can to make the navigation as direct, intuitive and convenient as possible.

We know there is a lot of information here, but it is technical and very specific in nature and what is important is knowing what you want, your priorities, values, ideals, goals and anything that is important. We will work with you to increase your awareness, understanding and perspective, as well as your capacity to make excellent decisions that work for you and that you are happy with.

We hope that the CVI website, personal correspondence with the CVI-OS 1.0 Dynamic Open Source Operating System is something that you will really like and benefit from in every way imaginable. Although there is a lot available, like any program, working with what is most relevant and useful is essential. This has been set up with pick and choose what you need or want with a lot of options, flexibility and capability that we hope you will probably find as a solid, streamlined and enjoyable way to achieve your goals and the quality of life you envision.

Have a great day, we have a lot of work to do, but it will be fun, challenging and rewarding!
