

Capital Vault Incorporated

Vision + Opportunity

Capital Vault Incorporated is a co-operative private member association focused on dynamic Membership Options and innovative business and capital solutions for enterprise development. CVI performs the function of private executive trustee and members are member/co-trustees. This endeavour is dedicated to the renaissance, development and growth of manufacturing, free enterprise, private investing, development programs and projects all having a theme that includes, "Buy, build, save & invest in Made in Canada eh!". Generally, the CVI-Options are Membership Options. Membership Options have Accounts. Accounts have Portfolios. Portfolios have Series or Class of Series. A Series or Class of Series may have Entities or Types. Entities may have capital structure and securities. Any type of Entity from any jurisdiction may exist or be created. These may all be in any jurisdiction, with various forms of organization structure, documentation, agreements, capabilities, mission and operating parameters.

Some accounts are included with the CVI-Option and others are extra, depending on your choices based on what you like, need or desire. These accounts are then expanded in greater detail within the corresponding Portfolio. There is no limit to the number or type of Portfolios in an account except that they are in accordance with the particular membership option. This continues to expand in greater detail again, as a Portfolio Series, Class, Type, Entity and so on, so that an incredible range of potential can be realized quickly, easily, simply as well as in more comprehensive provisions. These accounts, portfolios and related options may be utilized for any type of ethical business and financial transaction and provide a tremendous range of customization to be possible.

The CVI Membership Options as seen in the corresponding menu each have a primary theme, mission, capabilities and focus. Even as a company has capital structure to do certain things, we have membership structure, accounts and portfolios that are also focused to do certain things. All are exciting, powerful, dedicated, useful and advantageous concerning their particular endeavours. Even within a portfolio compared with another portfolio of a different membership, some common elements may exist, however considerable effort to minimize or eliminate duplication has been expended. What is essential to notice is the focus, direction, purpose and goals of a particular account and portfolio, these are operating parameters.

The operating parameters exist for a reason, and that is to be more defined, solutions oriented, flexible and segmented to perform more effectively and efficiently, with empowered levels of consolidated and condensed ideas, ideals, mission, values, symbolic language, the very essence of what we agree on, with the unlimited capacity to have vast amounts of intellectual capacity and expression presented in its simplest and more powerful form at any stage of development, point on the timeline and have available more comprehensive levels of intel, documentation, materials and presentation as may be required at each corresponding level. As capital structure has the weighted cost of capital, portfolios have a weighted expenditure of capital, energy, assets, resources and focus. These all add to the dynamic open source operating system capabilities of CVI-OS 1.0 with very integrated code structure that can be configured for any conceivable combination quickly, powerfully and ideally.

The more we can focus, even with a much bigger picture and operating environment awareness, the more consistent our results to be produced in line with those original operating parameters. Achieving goals, measuring our performance and productivity, adjusting our course of action if necessary and succeeding in every way possible generates the rewards and satisfaction we desire. This goes with the classic saying, “The main thing is to keep the main thing the main thing”. This works in harmony with how the brain and mind work. A request generates instructions, focus amplifies it. The neurons work as a simultaneous parallel processor, in addition to the sub-conscious and super-conscious mind level that can access so much more. Of course for those considering a spiritual perspective, higher dimensional spiritual knowledge, understanding, insight and wisdom is par for the course. We can solve problems and achieve goals by focusing on the solution, utilizing our various faculties and mind levels and work with a unified operating system. This applies to all problems and goals.

The CVI-Options all contribute an inter-related part to a greater system unified in common purpose. This included major aspects concerning ecological, environmental, social, cultural and community. Industry, trade and technology, products, services and capabilities are all essential to jobs, careers, opportunity, local economy and national economy.

The CVI Mission is directed towards dynamic self sufficiency and productivity with physical and mental states of prosperity, surplus, abundance and generosity, a revitalized way of living, thinking, being and doing is possible by working together to make our world a much better place with cheerful and willing mutual co-operation to build great things together. So, with perspective, awareness and solid point of reference we can let this all sink in. We each can envision an ideal future, an alternate reality and imagine what it would take to create that.

We know there is a lot to read, study and be aware of. Go at your own pace, what interests you the most, take you time, make notes if there is something you don't understand, if it does not resolve itself in time after being more familiar with everything or some aspects, please contact us. We are here to make a difference, not complicate your life. Hundreds of specialized portfolios is not complicated, they are focused, condensed with concentrated firepower in tune with values, ideals, mission and goals, they are focused and directed, that makes it easy.

The information is presented so that everything pertaining to that particular option or account is presented at that level, with the option that more is available. Although we all like fast and to the point, included also is greater communication on something general or specific, this is not because someone really likes to write, even though that is true, but that it is important to have that understanding, perspective, knowledge and awareness. Some of what you read might even be entertaining, informative, helpful, encouraging and more great news. Also, quite simply, if you like the personal style and presentation now, that's great, as it is the only one available.

Thank you for spending time on some of the important things we have in common and right now is the time to check out what's on the menu and find out more about CVI!
