

Capital Vault Incorporated - Portfolio Spectrum Intro

The thrill of exploring possibilities in a specific or general industry portfolio is very appealing to us in accordance with the general portfolio parameters that we have established. This is the Made in Canada altruistic gold standard for private venture capital for private Canadian companies primarily involved in manufacturing, scientific research and experimental development, valuable inter-related services and some very useful programs and projects unavailable anywhere else.

We desire to help create wealth generating power, increased prosperity, opportunity for learning, growth, challenge and reward without parallel and possibly unprecedented scale in the way that we envision new companies, dynamic job and careers development, technology, products and services in revitalized industries that are important to Canada, communities and people. This is not just work for us, it is fun and adventure, learning and doing something new, making friends and more and goes a whole lot further than the single bottom line with a dollar sign on it, it is national economic security, our future and life here and now.

Being action oriented offers no apologies, no excuses or trying, just doing, being, actively working at goals and achieving them, working in the direction of a greater mission. Of course, developing a relationship, making a family, personal and career growth, building a business, conducting research and development, promoting and expanding a more solid and dynamic industrial and economic base in a community, generating growth in national economics translating into much more than GDP are all examples that require dedication, investment, energy, effort and enthusiasm, in fact, lots of it.

The capacity for an individual or a group to actively do what they love and enjoy the most and truly being in their zone, focused on the grand purpose and true hearts desire, is one of our major concerns about what we care about. This enables a more complete expression of self development and self actualization, it is when all the lights go on and you really feel alive. With this type of experience we know that the quality of life is better for certain, this way exceeds anything material or monetary in value, it is happiness, contentment, fun, intrinsic reward and all those things we just can't put a price tag on. We hope that we can do more than help others be in their zone, we believe that we can achieve great things together and that is what we are here for.

With Capital Vault Incorporated, the investment ideal goes way beyond just money, anyone who spends the time to review things here, will realize that there are evidently several very dynamic, effective and profitable ways to get involved, even without investing, the diverse business options, buy, sell, trade, acquire and many more innovative business and capital solutions that go in the same direction, achieving common goals. The Portfolio Spectrum is diversified and is an expression of what interests us the most, what we care about is more of a co-operative co-creation enterprise, fun, adventure and long term friendships and business relationships. So, we would like to present, without any further delay, the Portfolio Spectrum and all the possibilities that exist right now and in the future.
